

May 8, 1974

SENATOR MARVEL: The \$118,274 is to go for actuarial science and live science field station to business administration as a result of many conferences held by those people in this particular area.

SENATOR CAVANAUGH: But, what are they going to do with the money?

SENATOR MARVEL: They are going to hire faculty.

SENATOR CAVANAUGH: That is all that my amendment says.

SENATOR MARVEL: No, it doesn't. Your amendment changes the whole approach to the problem.

SENATOR CAVANAUGH: No it says that it is an appropriation for an addition of 6.4 FTE faculty.

SENATOR MARVEL: Ok, let me rephrase the question. If that is your intent, why change the language.

SENATOR CAVNAUGH: It then says what you say it is for. What is wrong with that? If you say that it is for that purpose, and I say that the law should say that it is for that purpose how have I transgressed on the integrity of the Appropriations Committee.

SENATOR MARVEL: No, no, now your putting...you have not listened to what I have said. Your not transgressing on the integrity of the appropriations committee, all I said was that this was done according to the procedure that was set up by the Appropriations Committee like any other committee, then to contact those people who are closer to this than you and I are, which includes the administration, which includes the faculty, which includes the student body, which includes others which are connected with these disciplines in other institutions throughout the area and this is their suggestion. I think that what you need to say to us, or at least to me, and I'm not trying to speak to the rest of the Legislature what does your amendment do to improve the intent, if your intent is the same as this particular section, what does the amendment do to improve the intent. I think that is your mission in presenting your motion and I challenge you to show that your motion improves the intent in this area.

SENATOR CAVANAUGH: Well Senator Marvel if before we had this discussion and went around this room and asked 49 people what does improvement of student-teacher contact mean to you I think that I would have probably got 46 different answers. Now if I go around the room and ask what is the addition of 6 faculty members mean to you I think that everyone would say I think that it means that they are going to hire 6 faculty members. If that is the idea, let's say it in the bill. If the idea is something other than that let's say that. But improvement of student-teacher contact doesn't mean anything. Right?

SENATOR MARVEL: I think that we have discussed this in some detail as 9 laymen of the appropriations committee with educational officials and I think that we have generally
